Stoneware Chatsford Teapots

Chatsford teapots are designed to make the serving of high quality loose leaf teas and infusions easy, quick and efficient. All Chatsford teapots come fitted with a removable strainer.

The internal Chatsford strainers:

- remove the need for a conventional tea strainer
- enable tea leaves to be removed from the pot before the tea brews
- allow for quick and easy cleaning

They provide one of the simplest and most efficient methods of brewing loose leaf tea.

The patented design works well for specialist herbal teas and other blends which have large constituents.
